ARCHITECTURAL IRONMONGERY

NYLON DOOR FURNITURE

A Durable, Resilient and Attractive Range of Door Furniture and Accessories

George Boyd presents a comprehensive range of Nylon door furniture from Normbau, Hewi and HOPPE, suitable for most commercial and institutional applications.

Nylon is an ideal material for this purpose, offering exceptional strength and durability with the resilience to accommodate the strains and stresses of everyday use. Nylon gives a good anti-static behaviour and is resistant to corrosion and conventional domestic cleaners and disinfectants.

Available in colours that range from elegant pastels to bold primaries, and with an appealing organic aesthetic that derives from the moulding process, they offer many creative opportunities through their ability to contrast or blend with other modern interior décor materials.

A versatile range is available in either solid nylon or steel-cored nylon. The range includes; lever handles, roses, back plates and escutcheons, doorstops, finger plates and kickplates. Pull handles and cabinet handles are available with a selection of fittings including concealed screw and back-to-back.

Certain levers have been tested to PSA MOB H3 PS high-duty performance standards and to BS 476 part 22 1987, while steel-cored nylon furniture is suitable for use on fire doors.

For further assistance with all your Nylon needs please contact George Boyd on Lo-call 0845 601 3547.
